### AMENDMENTS TO THE SPECIFICATION

(Amendments are illustrated by showing deletions by ~~striketrough~~ and additions by underlining)

Please insert the following Abstract of the Disclosure as Required by 37 C.F.R. §1.72(b) :

--ABSTRACT

The present invention is directed to imidazolyl derivatives of the formula:

where the substituents are defined in the specification, or a pharmaceutically acceptable salt thereof. The derivatives bind selectively to the somatostatin subtype receptors and elicit either an agonist or antagonist effect from the somatostatin subtype receptors. The derivatives are useful for treating a variety of diseases including acromegaly, restenosis, Crohn's disease, systemic sclerosis, external and internal pancreatic pseudocysts and ascites, VIPoma, nesidoblastosis, hyperinsulinism, gastrinoma, Zollinger-Ellison Syndrome, diarrhea, AIDS related diarrhea, chemotherapy related diarrhea, scleroderma, Irritable Bowel Syndrome, pancreatitis, small bowel obstruction, gastroesophageal reflux, duodenogastric reflux, Cushing's Syndrome, gonadotropinoma, hyperparathyroidism, Graves' Disease, diabetic neuropathy, Paget's disease, polycystic ovary disease, cancer, cancer cachexia, hypotension, postprandial
